2022 Q2
 Preparing and conducting private sales for growth and development. Selection of HR-managers. Developing TOR for the team

2022 Q2
 Preparing and conducting a public sale to scale. Extension of the development team. Design development

2023 Q3
 Bounty 2%
 Air drop 5%
 Listing on crypto-exchanges

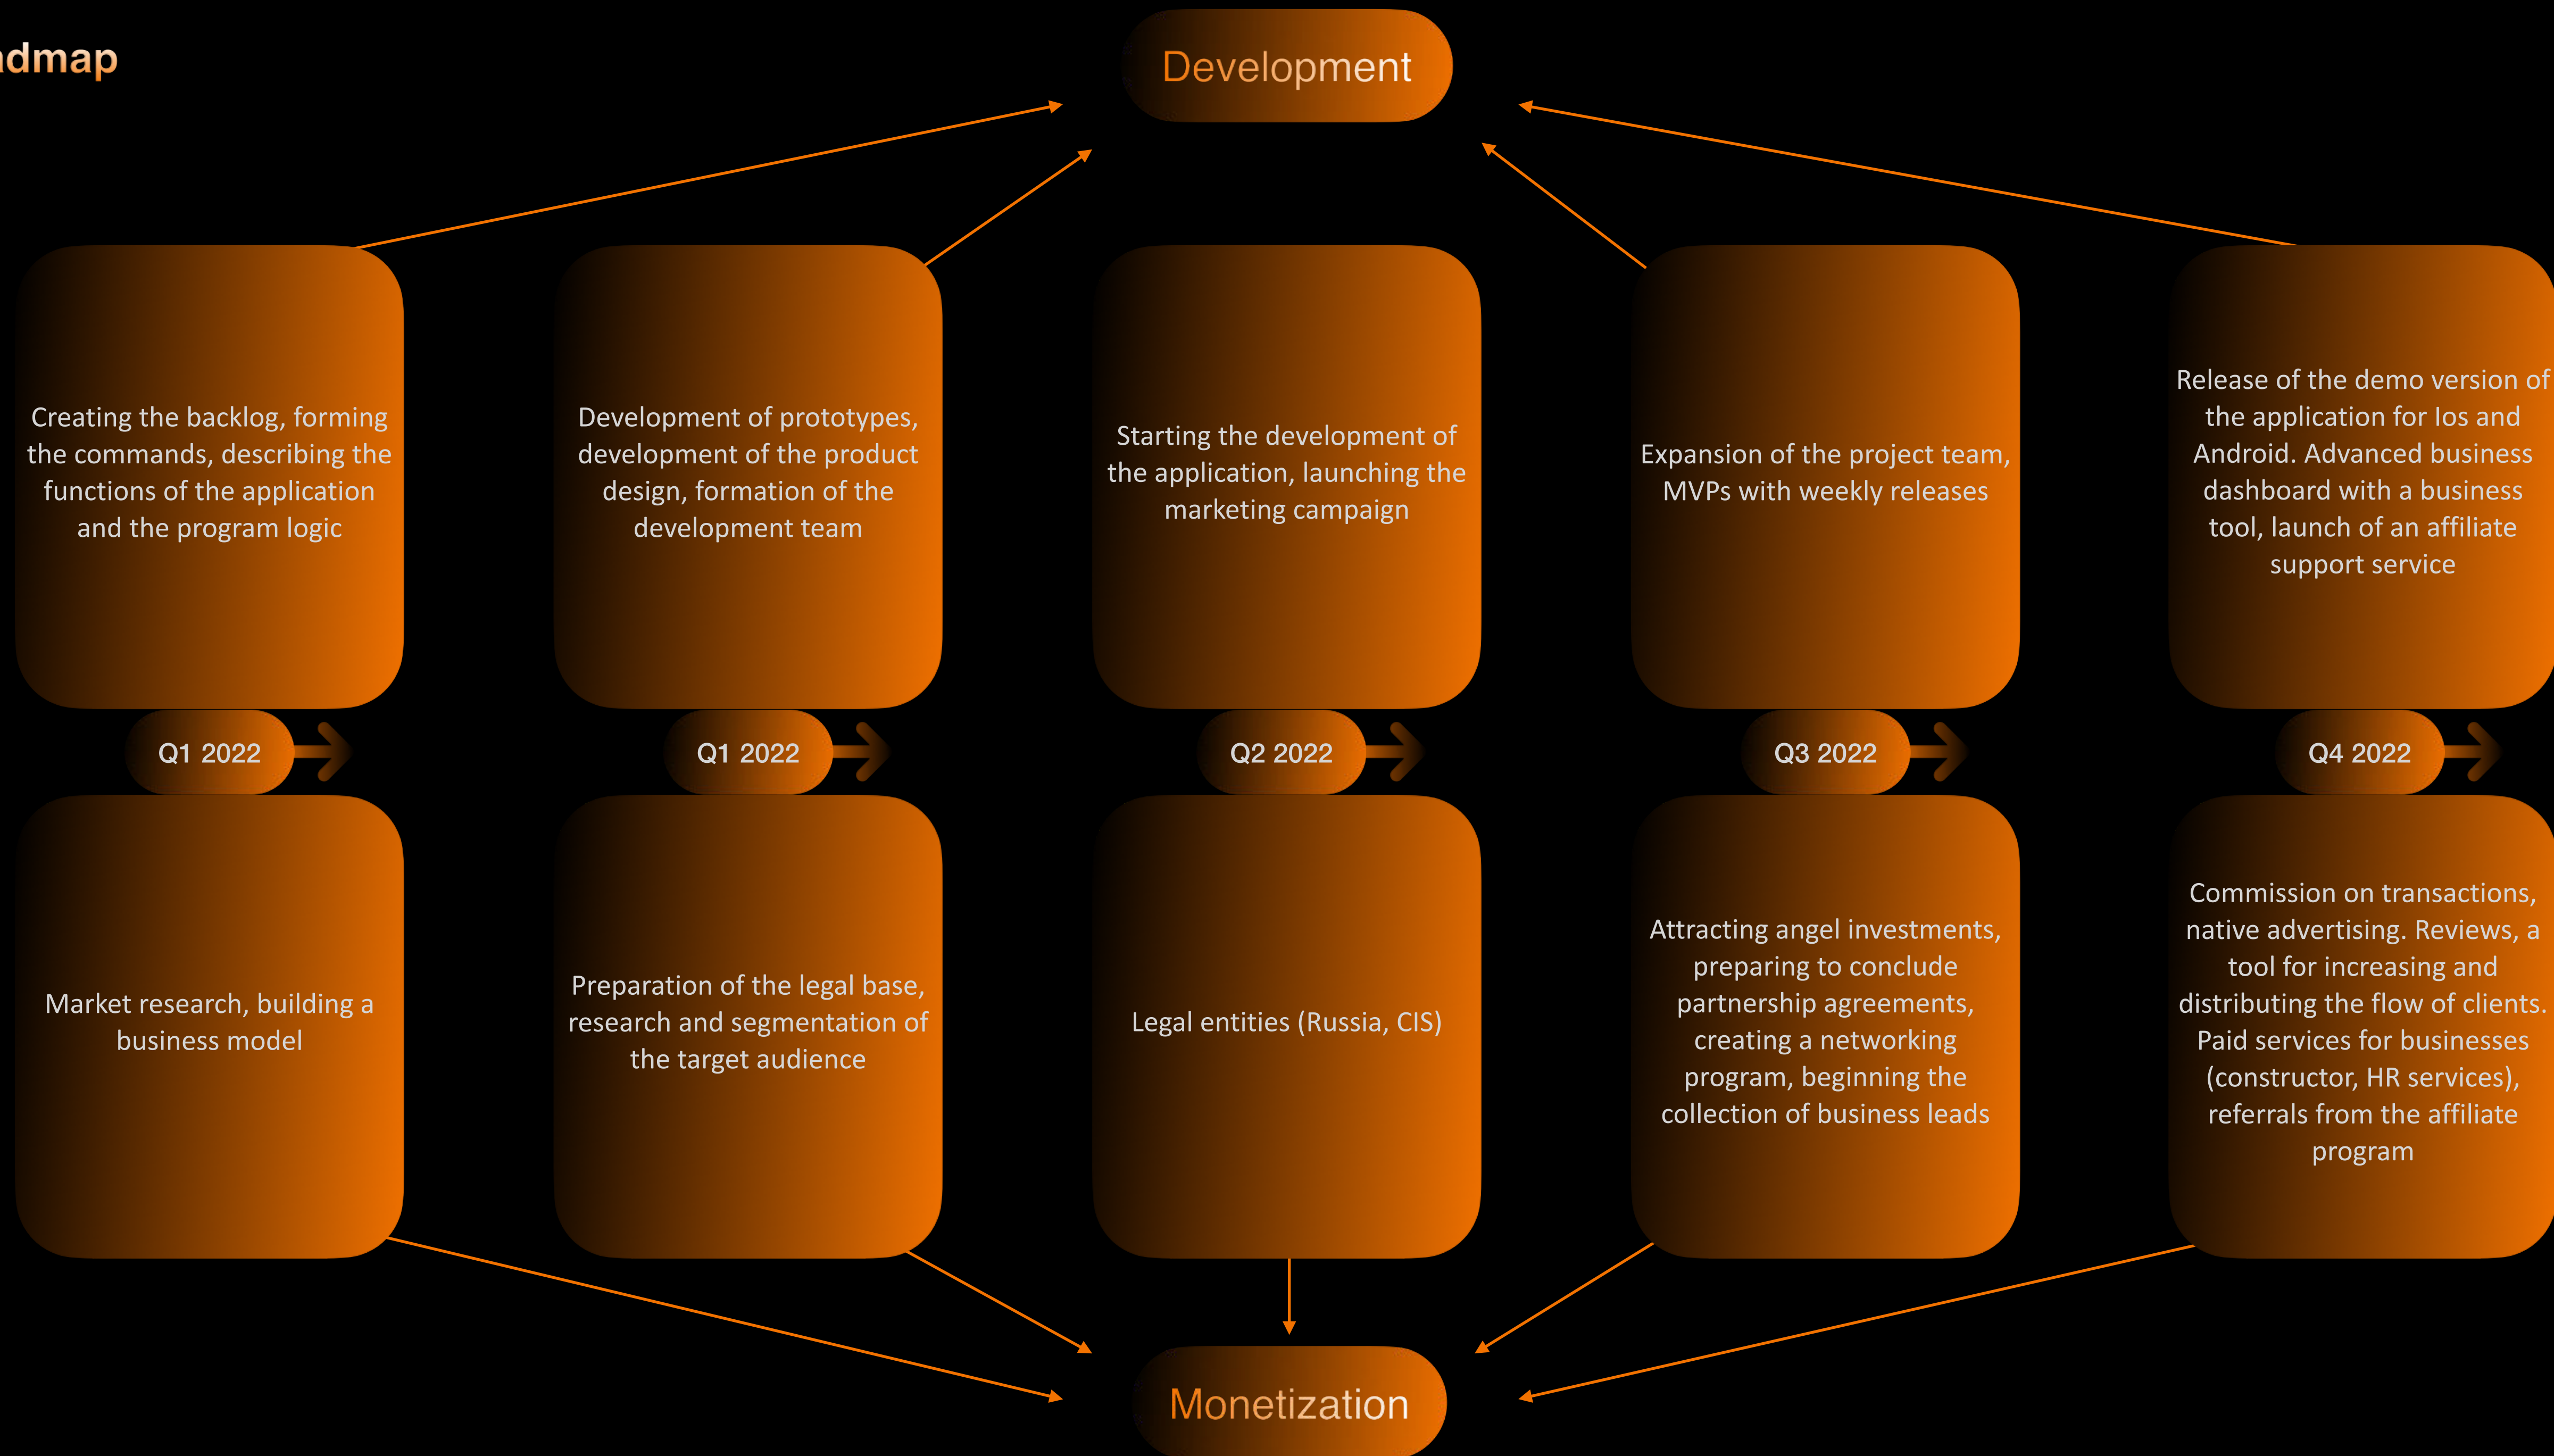

2022 Q3
 Demo version of mobile application for IOS and ANDROID. Mobile application testing

2023 Q3
 Launching an advertising campaign. Mass connection of hotels to Hotel City service

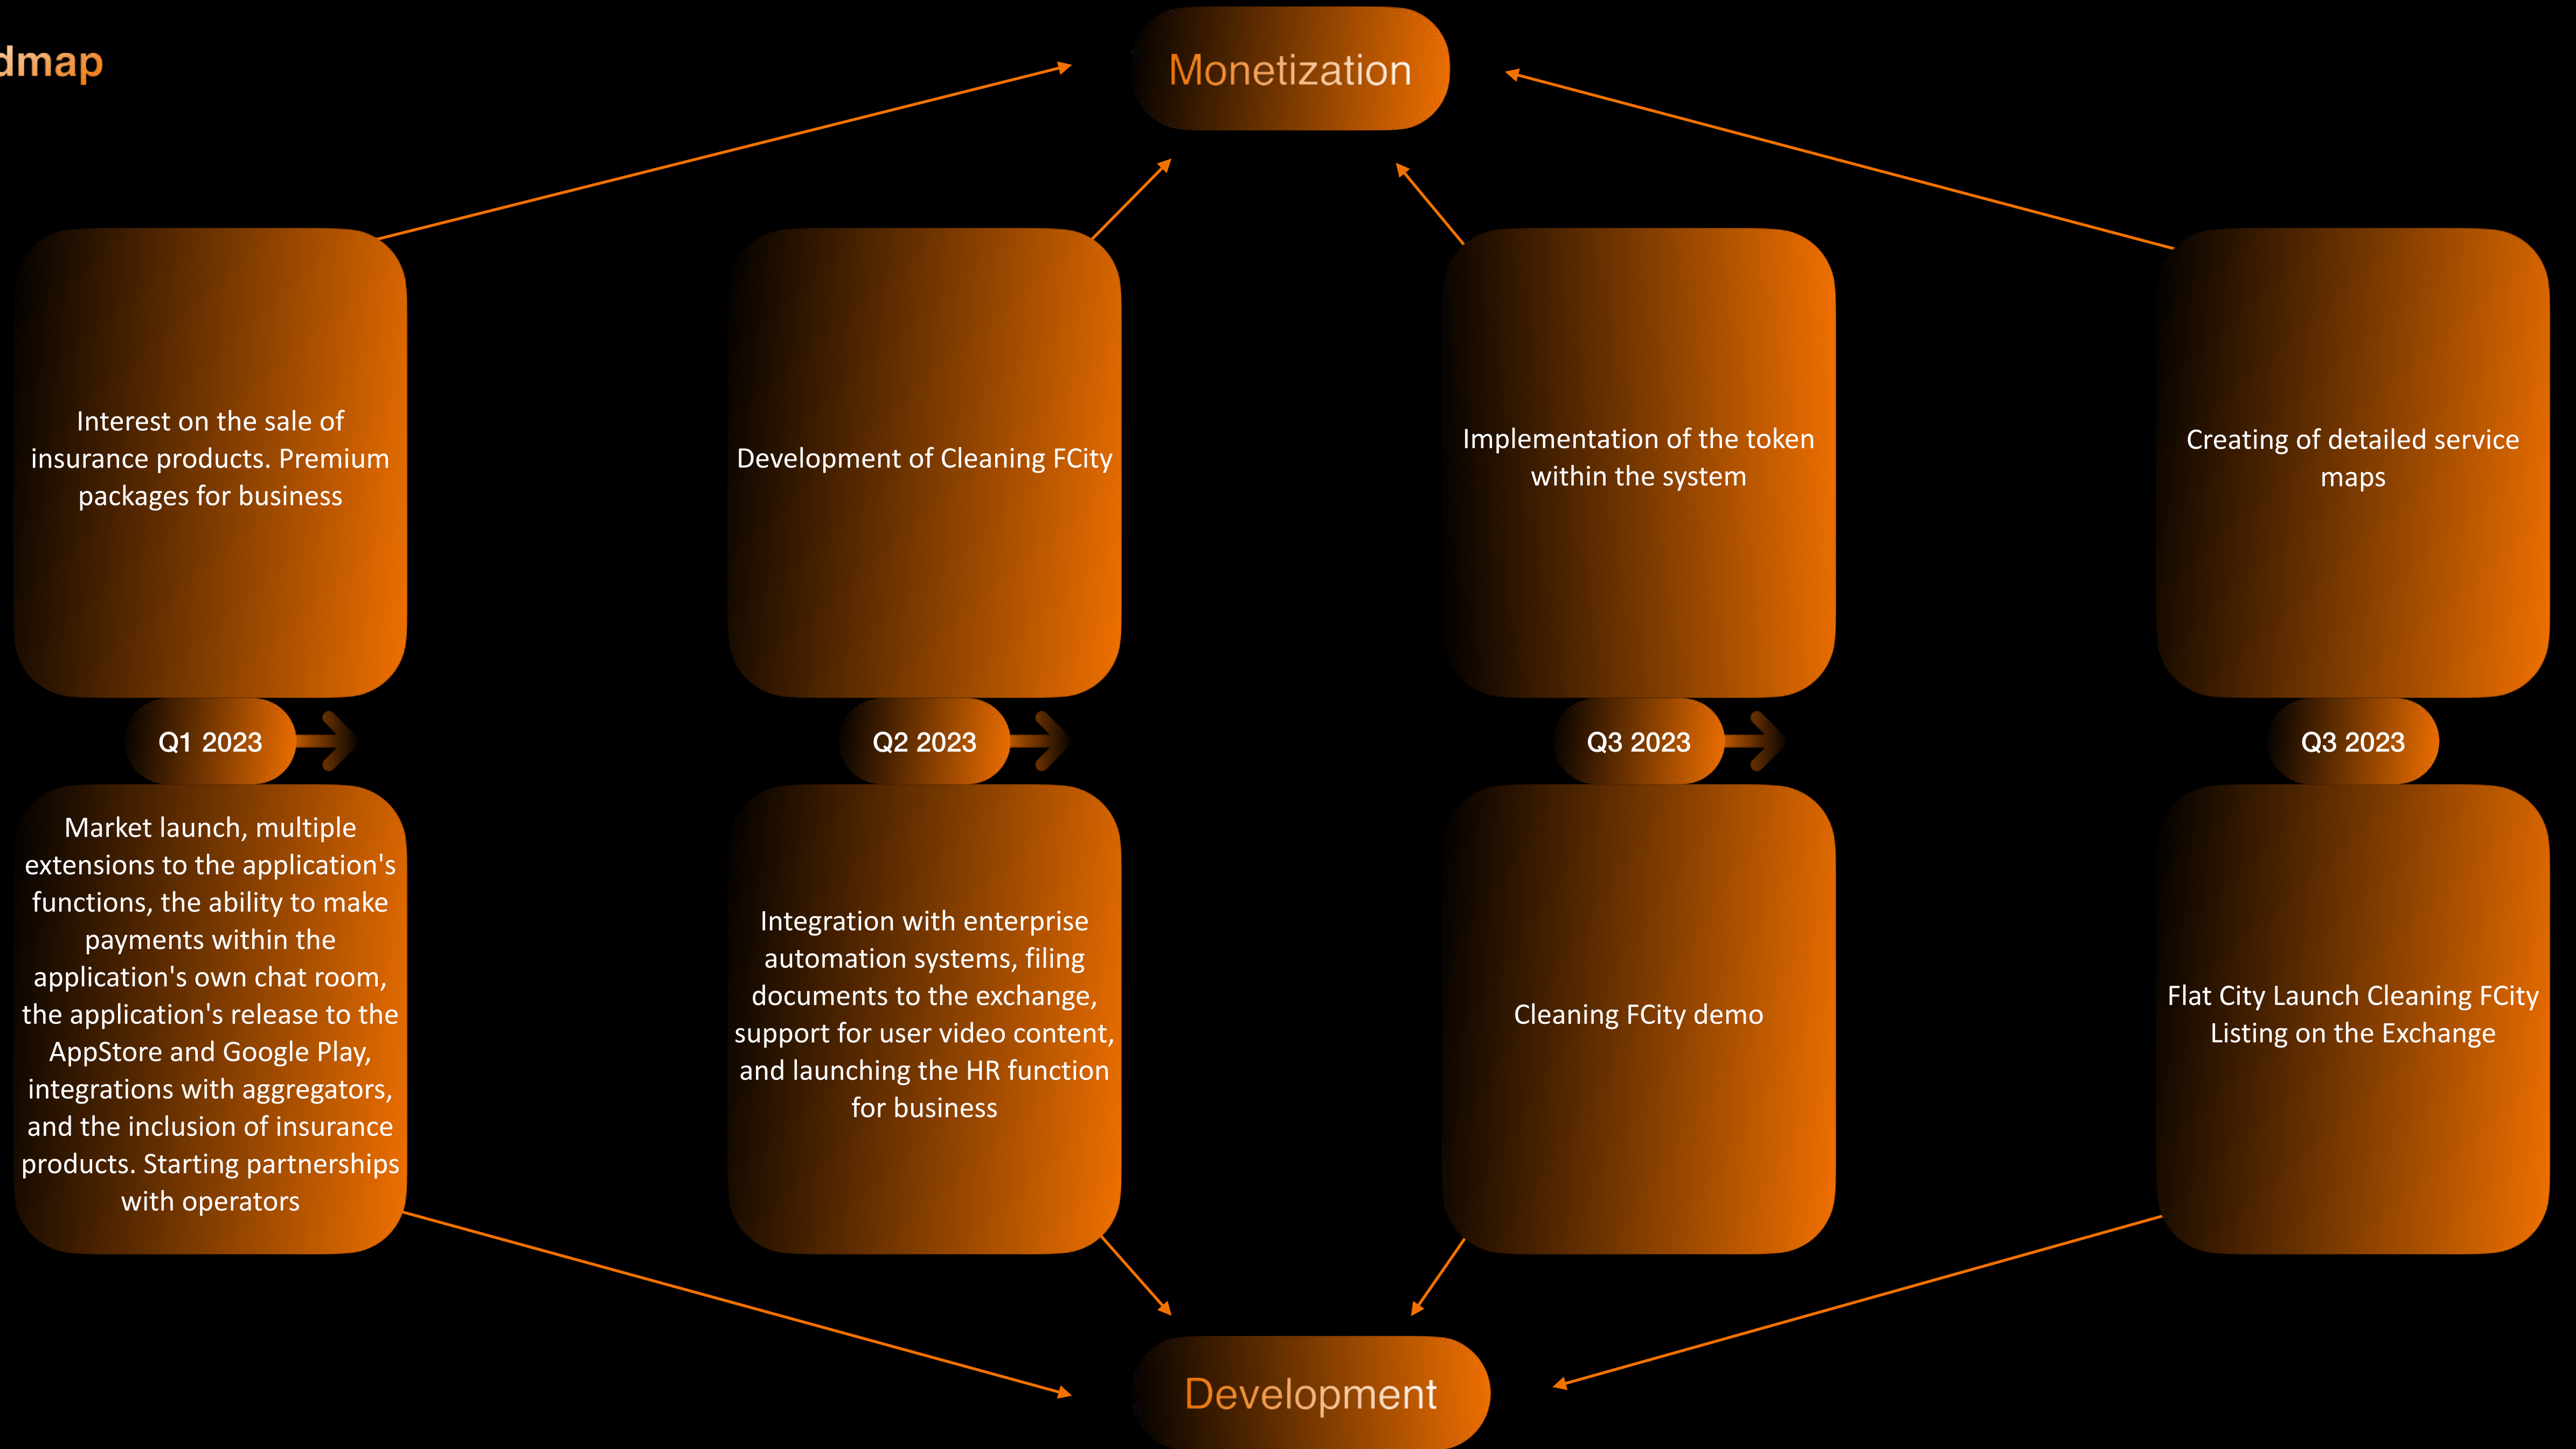

2022 Q3
 Release of mobile apps in the App Store and Play Market

Flat City will go beyond the usual, with the help of blockchain. Users will be able to make an objective choice of hotel thanks to video reviews. Each user who passes biometrics within the application will be able to leave video reviews and receive FCity tokens, which can then be used to pay up to 100% of the cost of the hotel and other services. For hoteliers we will add a field, through which landlords will be able to increase the sale of rooms, with information that only he knows and to support the text with video material. Through its technology and blockchain, Flat City will give serious competition to market sharks and by 2027 will become a leader in the Russian market, thanks to an entire ecosystem centered around one area of the user's life.

Roadmap

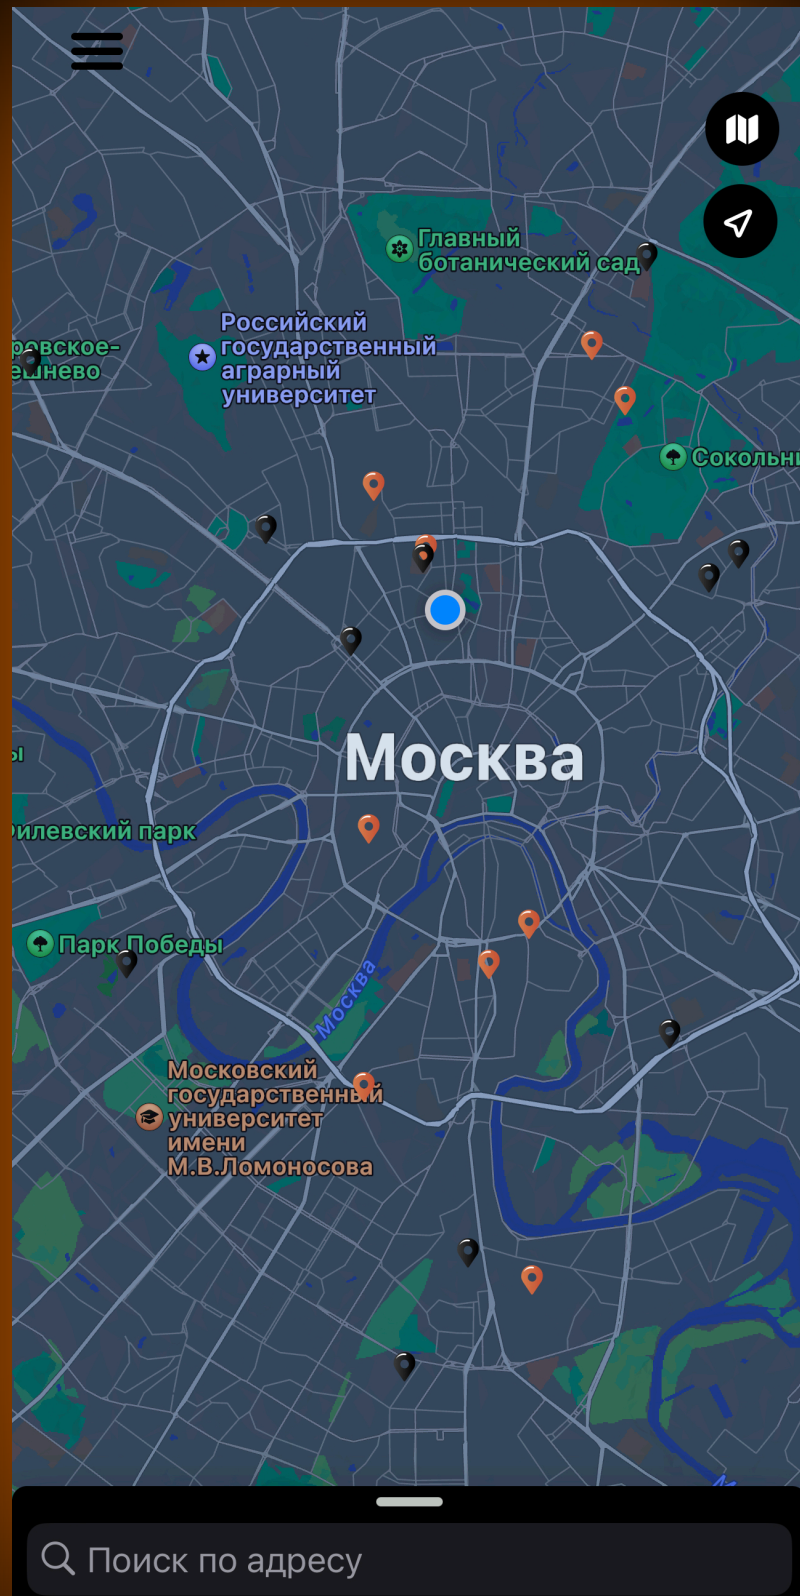

Roadmap

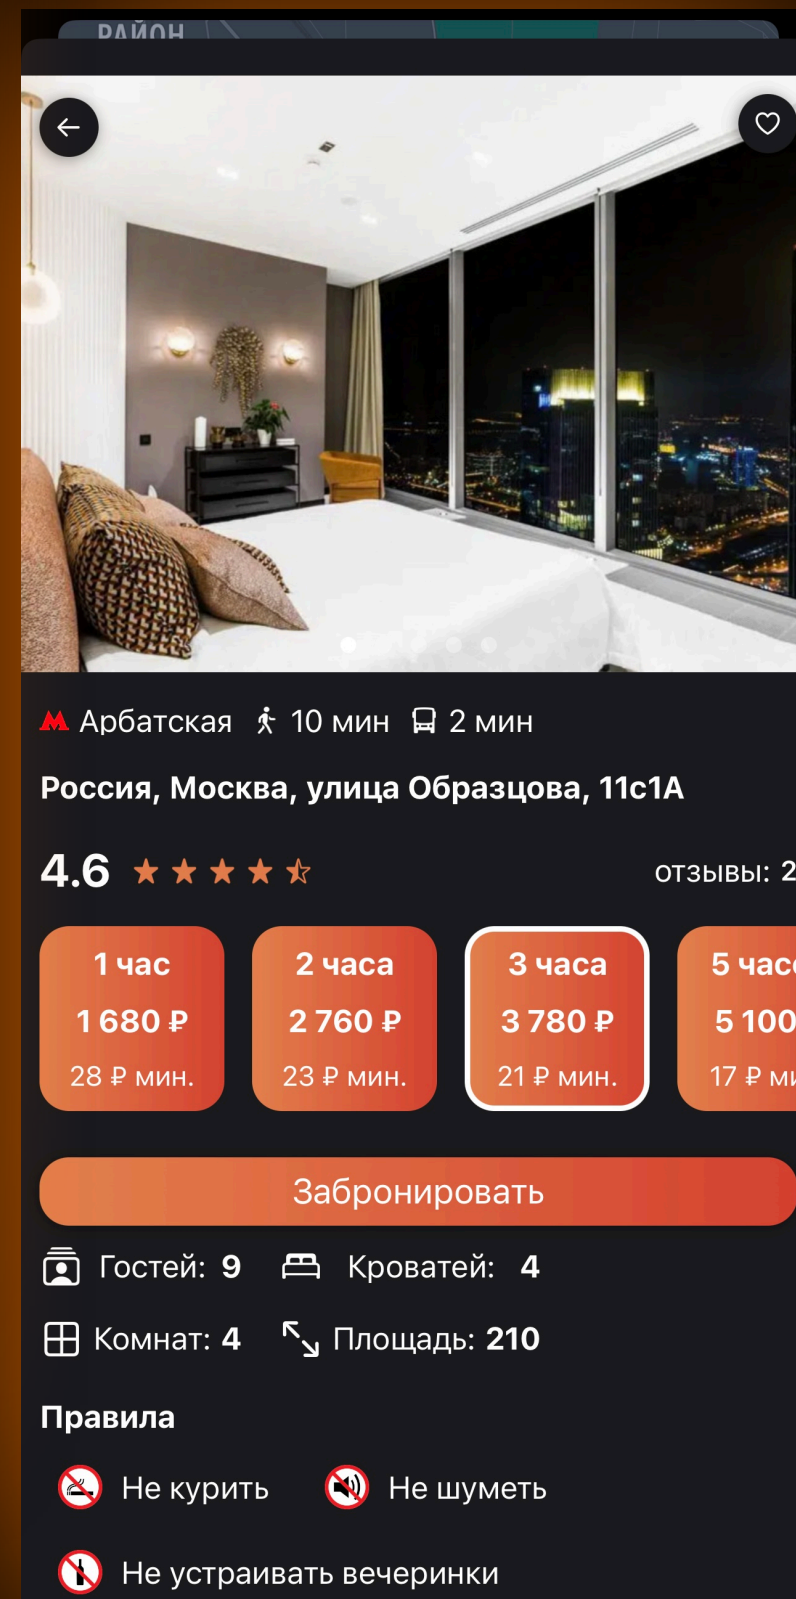

Review MVP

- Apartments anywhere in Russia and the CIS without intermediaries.
- Savings, the ability to rent without overpayment.

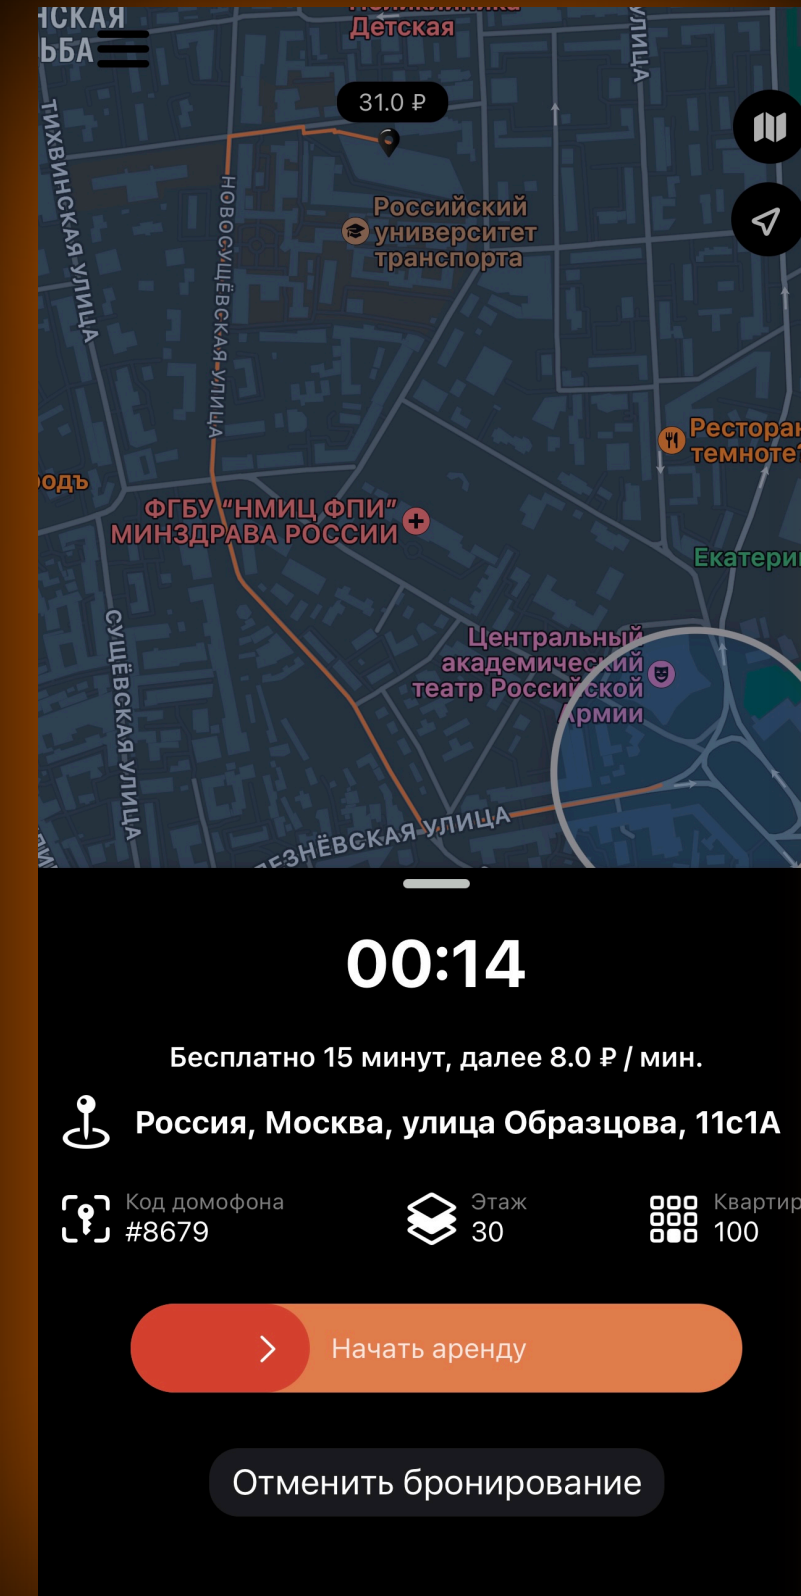

- Reliable information about your chosen property.
- Easy access to your local community.

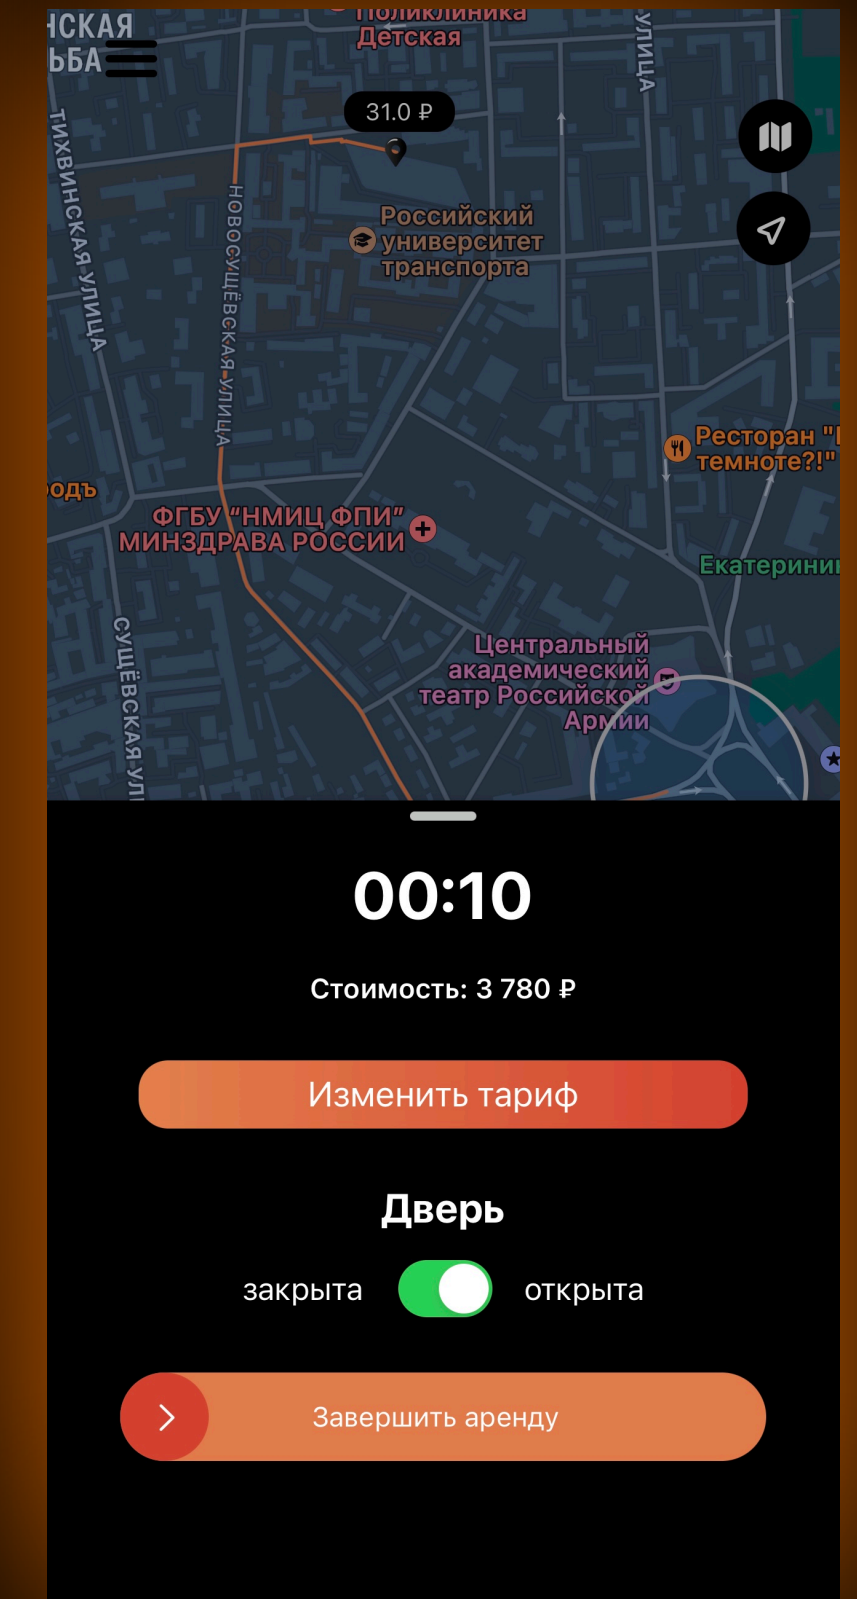

Free Booking Using geolocation and an algorithm calculates the time of your your way to the apartment and provides you with a free reservation

Instant verification of the user Upload your passport data and in a few minutes you can rent an apartment

Payment for services in the application Users can pay for rent in the app not only with the bank, but also with FCity token. Each account will have a crypto-purse tied to it for token payment

Allocation of tokens

Private sale 0.013\$
Public sale 0.048\$

Projected demand and price for FCity token

The main purpose of FCity token in Flat City, Hotel City and Cleaning FCity is to pay for rental and cleaning services, retail and small-wholesale FCity output into fiat currencies through the service, pay transaction fees and pay the cost of resources consumed by services. Thus, the FCity token is necessary for the functioning of all components of the ecosystem that have a link to the exchange rate. Based on the projected number of network users and expected annual turnover (taking into account the growth rate), we can get a justified market value.

Issue - 900,000,000

Private sale - 90,000,000 (10%)
Team - 90,000,000 (10%)
Stability Fund - 522,000,000 (58%)
Bounty - 18,000,000 (2%)
Air drop - 45,000,000 (5%)
Public offering - 135,000,000 (15%)

Distribution

5% of tokens will be distributed among investors who entered the Private sale

Private sale

In the first round of private sale it is planned to offer 90,000,000 tokens or 10% of the issue at the minimum cost with a lock up period of up to 3 months.

Public Offering

The remaining 15% of the coins will be sold out among live members of the Flat City ecosystem through a sales and promotional campaign.

Bounty Program

Flat City is booking 18,000,000 FCity for a bounty program that includes rewards in tokens for:

- Subscriptions and reposts on social media;
- Writing reviews and posts about the project;
- Publication of materials in the media;
- MVP testing;
- Applied tasks (design, forum moderation, translation of texts into other languages, etc.).

Stability Fund

Stored in multi-currency reserves, can be used during market collapses, lack of external financing. Reserve fund supports sustainable development of the project.

When users buy tokens in the application, they are deducted from the stability fund. For example, buying tokens for \$100 in the application means that tokens for \$100 from the stability fund will be burned, thus the project will eliminate the oversupply on the market and keep the token stable

Allocation:

Token parameters for private sale

Type: native token; Standard: TRC-20; Ticker: FCity

Option 1: private sale token price: \$0.013
Soft Cap: \$1 170 000

Minimum participation: \$100
Maximum purchase: \$200.000
ICO buyers are banned from selling for 3 months

Option 2: public sale token price: \$0.048
Hard Cap: \$19 440 000

Minimum participation: \$500
Maximum purchase: \$400.000
There is no sales ban period for ICO buyers Purchase token only for BTC, ETH, XRP, USDT in personal account on the official website www.flatcity.site

Monetization

Flat City will earn agent commission on all services made through the app. Depending on the type of service, agent commission could be up to 38% of sales. Part of the commission will not be charged to the business to provide a commensurate discount to the client. Another portion of the commission will be cashback for the client, paid by the platform. Cashback has no payment limits and can be used immediately upon completion of purchases. Cashback is subject to withdrawal from the system in the form of a token. Purchases made with cashback (up to 100% cashback payment) are also rewarded with cashback. The rest of the commission will be the profit of the app. Monetization of Payable Integration Modules. To implement Flat City's innovative technology, a crypto-purse will be linked to the user's personal account to provide the application's functionality; a micro-module architecture is used. The standardization of the architecture of a single module is applied, which allows charging payment in FCity coins (the base coin of the Tron TRC20 network) for the use of the services embedded in the integration modules.

Budgetary provisions

The funding raised from those interested in the development of Flat City service will be used to develop the platform, the Flat City and Cleaning FCity applications to maintain their internal functionality. The MVP application on the basis of IOS is being developed, after that the release of the Android version is planned. Today, any project and product at the first stage of launch needs a strong marketing strategy to become recognizable in the market and attract potential users. The Flat City application is positioned as a global project. It is planned that marketing and promotion of Flat City product will be carried out in Russia and CIS countries.
